

Step 1: Open program interface

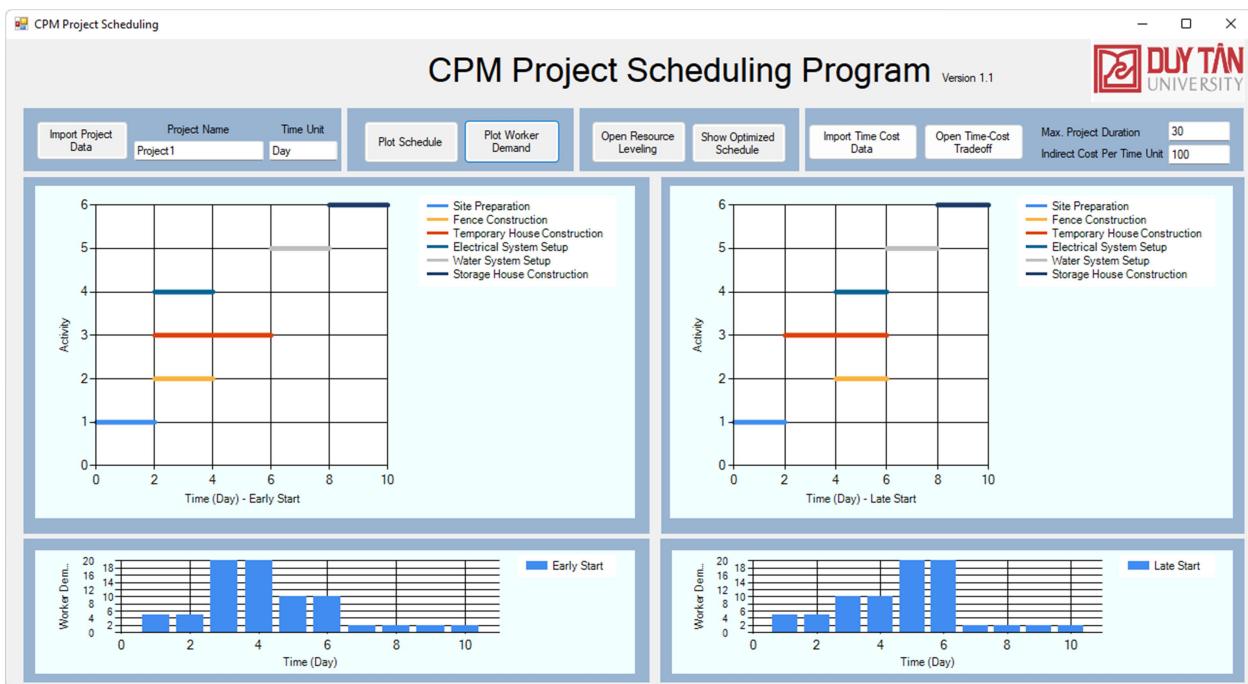

Step 2: Import Project Data

	A	B	C	D	E	F	G
1	Activity	Activity Name	Duration	Worker Demand Per Day	Predecessor	Predecessor	Predecessor
2	1	Site Preparation	2	5	0	0	0
3	2	Fence Construction	2	5	1	0	0
4	3	Temporary House Construction	4	10	1	0	0
5	4	Electrical System Setup	2	5	1	0	0
6	5	Water System Setup	2	2	2	3	4
7	6	Storage House Construction	2	2	5	0	0

Step 3: Plotting project schedule and worker demand

Step 4: Run resource leveling module

Step 5: Import time-cost options and run time-cost trade-off module
